

MEDFLOW 2.0 CLOUD BASED OPHTHALMOLOGY EHR

Medflow 2.0 EHR is a cloud-based system that streamlines your entire workflow and enables you to conduct thorough patient exams quickly. The tools are right at your fingertips. You can access dashboards, longitudinal chart reviews, graphs for vision and pressure, and past summaries. Our cloud technology gives you location freedom. Whether you're at the office, in the clinic, working from home, or checking in during a conference, you can access patient data immediately.

Not only do you get location freedom with Medflow 2.0, but you'll get some time freedom, too. Our system was designed to make providers as efficient as possible during the patient care process. There are no clunky workflows; we used common sense and sixteen years of experience to design Medflow 2.0. You can glide through the EHR process during even the most comprehensive exams, giving you the time you need to provide thorough face-to-face care to your patients.

Medflow 2.0 offers links from your exam findings to the ICD-10 so that you don't have to sift through the entire list when writing up a diagnosis, it then links the diagnosis to care plans. Care plans automatically generates impressions and assessments, medication orders, follow up orders, it delivers letters for referrals, co-management, and it sends important communication to the patient's portal. The diagnosis management and care plan capability saves you time on these actions and more!

MEDFLOW 2.0 EHR FEATURES

- Stable & secure cloud based application
- Intuitive design
- Intelligent workflows optimized for speed
- Agnostic to OS, device, & browser
- Meaningful use, PQRS, & ICD-10 ready
- Live online training
- 24/7 access to eLearning
- Interactive drawing tool
- Surescripts certified e-prescribing
- Image management
- Patient portal
- Seamless device integration
- Built-in billing calculator
- HIPAA secure
- 24/7 access to patient data with secure internet

THE PATIENT DASHBOARD

- A persistent vertical menu bar gives you access to any module or section of the chart
- Physicians dashboard keeps you connected to all relevant patient tasks and duties
- Message Center allows you to do your busy work anywhere anytime during your day
- Patient Dashboard provides a single facesheet summarizing all relevant information
- Customized exam templates define the work you need to do for any examination type
- Configurable workflow, ICD10 linking, user-defined care plans to ensure your charting accuracy

ENSURING AN EFFICIENT, PRECONFIGURED, INTELLIGENT WORKFLOW

Many professionals have expressed their frustration with current systems. Studies everywhere show physicians are looking for replacement systems and are burdened by their current EHR prohibiting them from seeing the number of patients they used to see on paper. Medflow has continued to study the market and we strive to improve. We are confident Medflow 2.0 EHR delivers usability, simplicity and configurability. Our system design provides convenience, efficiency and less stress so providers and staff members can deliver better patient care.

CARE PLANS AUTOMATE THE ENTIRE ASSESSMENT AND PLAN

Linked findings automatically display the correct ICD-10 codes which are linked to your care plans. Care plans autofill your data by automatically inserting medication orders, return visit orders, and send letters to referring physicians. It sends patient education material to the patient portal. It streamlines your process, enables you to get in and out of the room quicker, and most importantly, it gives you more time to spend face-to-face with your patients.

ONCE YOUR EXAMINATION IS COMPLETE YOU DIRECTLY MOVE TO YOUR DIAGNOSIS MANAGEMENT

- Examination findings are linked to ICD-10 diagnosis – never a long list to search through
- System automatically remembers and maintains your most used list of diagnoses
- Diagnosis linked to treatment profiles (care plans) expedite your assessments, orders and referral documentation
- Medication orders are automatically linked with care plans & ePrescribed upon processing your plan
- Letters for referrals, co-management, and patients are self-generated and delivered via direct messaging, efaxing or secure messaging to a patient portal
